Members: Tyler Fansler, Dazong Chen, Titus Bard, Chinwei Yang, Ryan Swanson
Project Name: Come To CO!

Project Milestone 3

Demo

In the demo, we showed Srinjita the current progress of the *Come To CO!* project, including 3 three fully working pages: title page, preference page and restaurant info page. We were able to present the following working features:

1. Presentable Homepage

2. Preferences Selection

3. Website Hosting

4. Recommendations: finished part of the recommendation feature which is created a list of good restaurants and bars we suggest.

Interview

During the interview, our TA suggested that we build a database of users using SQL. She also helped our group build a more dynamic webpage. The recommendations page is currently a static webpage that pulls pictures from the current working directory to display them on the website. Srinjita suggested that we instead make our webpage dynamic with Pug!
